

CHRC IS ACCEPTING PATIENTS VIRTUALLY

During the COVID-19 pandemic, CHRC is providing assistance to patients using telemedicine platforms.

Our registered dietitians are highly skilled and work with a wide range of nutritional issues including, but not limited to, weight management, lowering cholesterol, diabetes, cancer, eating disorders, kidney disease, and cardiovascular health. Our behavioral health services are offered by a team of licensed providers who specialize in treating anxiety, depression, life transitions, stress, and a wide range of other mental health needs. Health Education is offered virtually and your patients are encouraged to visit chrcsf.org or call for information on our most recent support groups and health education programs.

Talk to your doctor about referring us!
